## **DETAILED ACTION**

## Allowable Subject Matter

Claims 3-14, 17, 18 and 20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper.

The prior art fails to teach a combination of all the claimed features as presented in independent claims 3, 18 and 20.

Specifically regarding claim 3, Burger (6381072) teaches the state of the art of lens arrays.

But, Burger fails to explicitly teach an image pickup lens which satisfies a formula 1.0<MD/ED<4.0, wherein a maximum outermost diameter of the image pickup lens unit in a cross section which crosses orthogonally to the optical axes is defined as an MD and a maximum beam effective diameter in an optical system which is formed by a plurality of the optical elements is defined as an ED, as claimed.

Specifically regarding claim 18, Burger teaches the state of the art of lens arrays.

But, Burger fails to explicitly teach an image pickup unit wherein conditions of ST/TD<0.7 (condition 1) and MT/TD<0.5 (condition 2) are satisfied under the condition that: TD is defined as a surface interval on the optical axis from a first surface of the optical system which is formed by the optical elements that are cemented together to

the last surface of the optical system; ST is defined as a total length of the air intervals on the optical axis, and MT is defined as a maximum value of the length of the air intervals on the optical axis, as claimed.

Specifically regarding claim 20, Burger teaches the state of the art of lens arrays.

But, Burger fails to explicitly teach an image pickup unit which is used in the image pickup lens unit having a cementing surface wherein a condition of  $0 < | \phi/\phi A |$  <0.5 is satisfied under the condition that:  $\phi$  is defined as a power in the lens surfaces; and  $\phi A$  is defined as a power in an entire optical system in the image pickup lens unit, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph P. Martinez whose telephone number is 571-272-2335. The examiner can normally be reached on M-F 7:00 AM to 3:30 PM.
